

For Immediate Release

Delcom Engineering Ltd. Acquired by GENIVAR Premier Island organization joins leading Canadian engineering firm

Summerside, P.E.I. - February 4th, 2011 – Consulting engineering and land surveying firm Delcom Engineering Ltd. ("Delcom"), is pleased to announce it has joined GENIVAR Inc. ("GENIVAR") (TSX: GNV), a leading Canadian engineering services firm. Delcom's leadership team, including President Clark Baglole and partners Larry McQuaid and Luc Van Hul, will remain with the company and Delcom's 15 staff members will continue to serve clients in both Summerside and Charlottetown locations.

"GENIVAR is really the perfect fit for us," said Clark Baglole, one of the founding partners. "Our culture and values are completely aligned and our strong entrepreneurial spirit is matched by that of GENIVAR, enabling us to continue to offer practical and innovative solutions to our clients in the manner that they have come to expect."

"With an increasing national need for infrastructure renewal, consulting engineering is a growing market segment," said Larry McQuaid, a founding partner. "With GENIVAR's comprehensive resources and vast pool of multidisciplinary skills backing it, Delcom is in an enhanced position to take advantage of growing opportunities in the market."

"Joining GENIVAR is not only a good fit for us, but it opens up so many possibilities, enabling us to undertake larger and more complex projects," said Luc Van Hul. "Our staff will also have increased career and project opportunities both here and abroad."

Delcom's staff operates from two locations in Summerside and Charlottetown, while GENIVAR has more than 4,500 staff in over 85 locations in Canada and internationally. In 2010, GENIVAR completed a diverse range of projects in over 35 different countries.

"We're very excited to have Delcom join GENIVAR," said Stephen Wallace, Vice-President, Atlantic Canada of GENIVAR. "Delcom has a strong history of success and is well respected in the fields of engineering and surveying. This acquisition, our first in P.E.I., and our second in Atlantic Canada will strengthen our foothold in this region," he added.

A leading global firm, GENIVAR's decentralized business model provides flexibility and close client relationships by focusing on a regional approach while giving access to the entire range of expertise of its broad network. This model has proven successful during GENIVAR's active pursuit of strategic growth, resulting in over 50 firms joining the company in the past five years.

About Delcom Engineering Ltd.

Delcom, which was founded in 1983, has over 25 years of experience in delivering practical and effective solutions to clients. Delcom is a leading single-source provider of professional engineering, planning, and land surveying services.
